

Green Consulting, LLC is a woman owned Idaho-based business that provides information technology services including software development, cybersecurity, infrastructure, and cloud-based solutions. We support commercial and government clients with information technology solutions that work today and can scale for tomorrow.

SOFTWARE DEVELOPMENT

Green Consulting has a professional software development team experienced in the development of a wide variety of applications. Our team specializes in Web application and database development. Our capacities include:

- Custom software development
- Web applications
- Database design
- Intranet and extranet solutions
- Hosted and integrated solutions
- Advanced software quality assurance
- Nuclear Quality Assurance (NQA-1)

In software development, we provide:

- Complete software development lifecycle, including requirements analysis, design/architecture, implementation, testing, distribution, and maintenance.
- Platforms including servers, desktops, tablets, and personal digital assistants.
- Programming languages, including C#/.Net, VB/.Net, Java, JavaScript, HTML, and Visual Basic.

CYBERSECURITY

Our cybersecurity experts work to protect systems, networks, and programs from digital attacks. We work to prevent the accessing, changing, or destroying of sensitive information. We work to protect systems from the interruption of normal business processes and loss of valuable resources. Our team is up to the challenge of implementing effective cybersecurity measures in an ever-changing environment.

Our cybersecurity approach has multiple layers of protection spread across the hardware, networks, programs, or data that one intends to keep safe. In an organization, the people, processes, and technology must complement one another to create an effective defense from cyber-attacks.

TECHNICAL SUPPORT

Managing your business's information technology can be a bigger task than you planned. Without professional help, you risk data loss, loss of productivity, and Cybersecurity risks. We can help support your business with IT support services from basic support to advanced network security.

TECHNICAL CONSULTING

Our technical consulting works to match you with a technical expert who will learn your business needs and processes. Your technical consultant can help you streamline processes, remove roadblocks, and maximize efficiency. We are available to work with you in a variety of ways, depending on your needs. We can help with:

- Managed IT Services
- Network Security
- Backup and Business Continuity
- Automation
- Cloud Migration
- Compliance

CLOUD SOLUTIONS

Cloud solutions can deliver IT resources on demand over the Internet. We can help you implement cloud services like Microsoft Azure, Amazon Web Services, and Google Cloud Platform to deliver everything from applications to data centers on a pay-for-use basis.

With cloud solutions, your IT resources can scale quickly to meet business demands. Cloud solutions enable rapid access to flexible and low-cost IT resources without large upfront investments in hardware or time-consuming installation and maintenance. We can help provision exactly the type and size of computing resources needed to power a new initiative or operate your IT more efficiently.

COMPLIANCE

Doing work for the federal government can come with many IT and cybersecurity requirements. Understanding and sensibly implementing these standards allows businesses to be successful in doing business with the government. Updates to the Cybersecurity Maturity Model Certification (CMMC) have helped reduce the barriers to compliance for small and mid-sized companies.

INFORMATION TECHNOLOGY SUPPORT

Managing your business's information technology can be a bigger task than you planned. Without professional help, you risk data loss, loss of productivity, and cybersecurity risks. We can help support your business with IT supports service from basic support to advanced network security.
